DETAILED ACTION

Allowable Subject Matter

1. Claims 1-14 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The prior art relied upon in the first office action rejection by Sanderson (4,790,230), Lee (6,472,589), Fields (5,237,125) and Brull et al. (4,818,132) no longer teach all the claimed elements of the independent claim 1, or its dependent claims, and no other prior art references could be found that teach said claimed elements, therefore the independent claim and its dependent claims are considered allowable.
4. The independent claim 1 is allowable over the prior because the amended claim states that the sensor is insertable between the keys and the bottom surface of an open-position fallboard, and that the sensor senses movement of a portion of the keys behind the open-position fallboard. The prior art stated above, and a second reference by Sanderson (6,777,604), shows a sensor inserted at the back of the keys, between the keys and the fallboard, however they fail to show the sensor between the keys and the bottom surface of the open-position fallboard, or the sensor sensing movement of a portion of the keys behind said fallboard. The prior art merely shows the sensor sensing movement of a portion of the keys in front of the fallboard. Therefore, claim 1, and its dependent claims 2-14, have been deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
